

# ***Star Command I***

## ***Precise, Reliable Spraying Technology for Turf Professionals***

The **Star Command I System** is expertly crafted for turf professionals who prioritize precision and efficiency in their spraying operations. This advanced system combines the **TeeJet Radion 8140 field computer** with the DynaJet pulse width modulation system to deliver exceptional control over droplet size and pressure, enhancing application accuracy and minimizing drift.

- **ADVANCED RATE CONTROL**

The TeeJet Radion 8140 field computer ensures consistent application across variable conditions, reducing waste and improving coverage.

- **PULSE WIDTH MODULATION**

The integrated DynaJet system provides precise control of pressure and droplet size, enabling accurate spraying even at varying speeds.

- **ADAPTABILITY**

Excelling across a wide range of ground speeds, the system maintains consistent droplet size and rate, ensuring smooth application regardless of terrain.

- **BUILT FOR PERFORMANCE**

Featuring a durable spray boom with dual nozzles and dual-solenoid valves, the system is designed to meet the rigorous demands of modern turf maintenance.

- **ENHANCED SPRAYING DYNAMICS**

The Radion system acts as the cornerstone of the Star Command I setup, offering standalone capabilities or enhanced functionality when paired with the DynaJet system. This synergy ensures that every spray application is precise, from controlled pressure to optimized droplet size, across every inch of your turf.
